

2" NPT FAR 2250 Series Air Separator

Out of stock

\$251.14 USD

SKU: 2250-2

Deaerators are installed on hydronic heating and cooling systems for the purpose of eliminating air from the system, extending the life of system components and preventing flow restriction due to pipe air locks. The patented design of the FAR 2250 Series Air Separators is proven to be the most efficient design for air elimination from closed loop hydronic systems
