

Grundfos UPS43-44FC, 3 Speed Circulator, 1/6 HP

Out of stock

\$556.34 USD

SKU: 52722514

Grundfos UPS43-44FC circulator pump has a cast iron construction and an integral check valve, that can be removed. The three speed motor (Low/Medium/High) allows you to customize the circulator to match the systems requirements. It can be used for many applications including boiler primary loops, radiant, fan coils, baseboard and even zoning. Grundfos UPS Super Brute pumps use a wet rotor design which has a virtually silent operation.
