

HBX SNO-0110 Optical Snow Melt Sensor

\$598.75 USD

SKU: SNO-0110

HBX SNO-0110 optical snow melt sensor uses optics rather than the typical metal components to sense the presence of snow/ice on a driveway or walkway. The sensor provides the SNO-0550 with information on snowfall intensity, and allows for multiple snowfall sensitivity settings, which can result in cost-savings to the home owner.
