## Natural PEX-C Heating Pipe with O<sub>2</sub> Diffusion Barrier

The AquaHeat Pex-C pipes are produced from special HMW-HDPE resins. The crosslinking is performed in a state of the art E-beam accelerator after the production process, resulting in irreversible cross-links between adjacent P.E. chains. The crosslinking process renders the pipe improved mechanical process such as; resistance to corrosion and pressure at high temperature, exceptional high abrasion and superb chemical resistance, and excellent longevity at high temperatures. Product is coated with oxygen diffusion barrier which prevents oxygen from entering the heating system through the pipe wall. Covered by a twenty-five year manufacturers warranty.
