ProMix 63000 3-Way Mixing Valves

ProMix 3-way valves are ideal for mixing or diverting applications in heating and cooling systems. The required system temperature is obtained by adding a suitable portion of return water to the boiler flow. The mixing proportions are adjusted manually or, in automatically controlled applications, by means of an actuator (62062/62063). The scale is graduated on both sides and can be turned allowing a choice of mounting positions.

Part #	Size	CV v GPM
63034	3/4"	7.3
63010	1"	14
63114	1-1/4"	21

Part #	Description
62062	Proportional Motor 0-10V, 2-10V, 0-20mA
62063	Floating 3 point motor w/end switch
