ProMix 64000 4-Way Mixing Valves

ProMix 4-way valves are designed for use in commercial or residential heating and cooling systems, to control and distribute water or corrosive liquids to different zones. The 64000 four way valve features a double mixing function. When hot water from the boiler is mixed with the return water, the temperature of the return water rises, reducing the risk of condensation and assuring a longer boiler life. The mixing proportions can be adjusted manually, or in automatically controlled applications, by means of a control motor (62062 / 62063). The scale is graduated on both sides and can be turned, allowing a choice of mounting positions.

Part #	Size	CV v GPM
64024	3/4"	7.3
64025	1"	14
64030	1-1/4"	21
64040	1-1/2"	35
64050	2"	50

Part #	Description
62062	Proportional Motor 0-10V, 2-10V, 0-20mA
62063	Floating 3 point motor w/end switch
