

SAY GOOD-BYE TO PIPE RUPTURES!

**New Woodford
Model 19 Faucet
Solves The Problem.**

The home owner closes the **Model 19**, but leaves the hose on. An unforeseen cold snap occurs. Most outside faucets in the area, with hoses left on, freeze up and cause a pipe rupture. **Not the Model 19.** It's designed with the patented Pressure Reducing Valve. The freezing faucet can't build up enough pressure to rupture the pipe. **Smart home owner!** It's a new era in outside plumbing. Brought to you by Woodford Manufacturing. Ask your plumber about the 5 year Limited Warranty. This unit also offers anti-siphon protection. Includes a powder coated cast aluminum handle.

- Manufactured under one or more of the following patents: 5,590,679; 5,632,303; 6,805,154; 6,532,986 and patents pending
- ASSE Standard 1019 - Listed
- IAPMO Listed
